PARK AND PLAYGROUND EQUIPMENT

Traditional

KidsTale is a world leader in durable and creative traditional modular playground equipment. Designs can be customized to meet your unique needs, such as age groups, specific activities, budget restraints, inclusion and accessibility, or unique site requirements. Quick ship items available.

Early Childhood

We feature developmentally appropriate and creative equipment for both the 2-5 and under 2 age groups. Early Childhood presents unique requirements for developmental needs and simply making older kids equipment smaller and less challenging is not an effective solution.

Inclusive

Inclusive play is not just about the equipment, but about the site design. Building play areas that allow able bodied children, children with mobility issues, children with developmental and cognitive issues and their family and friends to play together is what makes a play area inclusive.

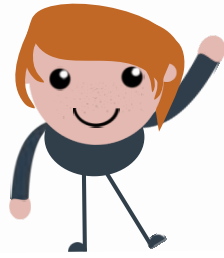

Themed

Nothing stimulates a child's mind or enhances the beauty of a park like a playground that looks like it came out of a story book or a child's imagination. If you can dream it up we can find a way to build it. Themed play areas are both engaging for kids and something that enhances your community spaces.

Music

Incorporate musical elements into your play space to encourage creative interactions between children of all abilities and ages. A playground symphony is not out of the question!

Challenge

Challenging play opportunities are important for both child development and introducing an element of risk (AKA - fun)! We can do a lot with - from ninja courses to giant climbing structures custom designed for your area. Multiple levels of challenge can be designed in making them a great inclusive part of the play area.

Contemporary

Psagot Playgrounds offer contemporary designs to make your play area stand out from standard play areas. Bring another level of excitement to your play space and let us customize the design to your unique needs.

iKubes

A geometric marvel, iKubes can be stacked in endless configurations. iKubes add an artistic flair to any play environment. Play inside and out - or add a slide for an exciting way down!

Services and Help

We know that you are probably not an expert in site construction or public playground safety standards. That is why we are. Contact us today and we will send a consultant to your site to help you find the best path to achieving your project goals.

- Staffed Support Office
